To complement its position as the leading UK manufacturer of Motorcycle Exhausts Motad has teamed up with a leading French manufacturer to become the official Factory Appointed UK Importer of the Ninja and Pro-Gun brands of scooter exhausts.

Since 1986 the brands Ninja and Pro-Gun have distinguished themselves in their home market where they are well known for the supply of well designed, well engineered, well manufactured exhausts for a range of scooters from 50cc to 500cc.

From an early collaboration with Peugeot when they made the O.E. exhausts for the scooter factory, the Company has invested time and effort into developing several ranges of exhausts for over 200 scooters and motorcycles.

Designed to be a perfect fit to replace the Factory exhaust Ninja offer a replacement that competes with other aftermarket brands on price whilst offering performance, longevity, and value for money. Where required Ninja supply clutch springs and rollers to ensure optimum performance to match or exceed the power requirements of the exhaust to the engine for which they were developed.

Available in Stainless Steel, Polished Aluminium, Coloured Aluminium, Carbon Fibre, and painted steel, there is an exhaust available to match all requirements of style and price.
